

Our association has set different objectives and we count on your collaboration to make it progress. The site will evolve according to the information that we can obtain.

If, the first objective is solidarity among us and mutual aid, we have the wish to be able to provide information to doctors who know little about this disease as well as the effects on our bodies and our lives.

The information provided on our site is intended to improve, not to replace, the relationship that exists between the patient (or site visitor) and his doctor.

For this purpose, we have initially developed a questionnaire and we would be grateful if you could answer it.

All your ideas are welcome, this is our association for all. When we have reliable and valid information we will communicate it to you. Apart from the A.G., if you wish, we can plan a mini-symposium to share the information. We are at work and count on you to help us. We remind you that this is a site for patients with Tarlov cysts.

Best regards to all of you,
Delphine Carpentier
President of the association.
